

DAY: 02

17/01/25

### 3. Extra Tools:

- Shipment tracking for delivery updates.
- Secure payment options for safe purchase.
- This will create a simple, reliable, and easy-to-use shopping experience.

### "Design System Architecture"

- Users visit the website to browse furniture product like tables, beds, and chairs.
- The frontend (Next.js) displays products details dynamically, fetched from (Sanity CMS).
- When users place an order, the details are saved in "Sanity CMS" via an API.
- Real-time shipment tracking is managed through a third-party API.
- Payments are handled securely using a payment gateway, and all confirmation are stored in Sanity CMS.
