

DAY: 02

16/01/25

Hackathon: 3

- Day 2 - • Furniture E-commerce Plan.

We are creating a furniture website using • Next.js • for the frontend (fast and works well on all devices) and • Sanity CMS • for the backend (to manage product, orders, and customer information).

"Main Features:"

1. • Frontend Fea (Next.js):
 - Quick and mobile-friendly design.
 - Important pages: Home, Categories, Product Details, Cart, Checkout, and Order Tracking.
2. • Backend (Sanity CMS):
 - Store and update furniture details (like sofas, tables), orders, and customer info.
 - Easily edit furniture descriptions, prices, and stock.
